## A video collection.

According to Disabled World, disability awareness means educating people regarding disabilities as the biggest barriers people with disabilities encounter are other people. Disability etiquette are guidelines dealing specifically with how to approach people with disabilities. The informative videos at Disabled World help teach and make people aware of disability issues and persons with disabilities in society

## Disability History Museum.

The Disability History Museum’s Library is a digital archive that only exists online. It contains digital versions of images, texts, and other artifacts related to disability history that have been gathered from libraries and private collections across the country. Materials in the Library date back to the 18th century and represent all disability categories across the life span. The goal is to create a theme-based, searchable collection of primary source materials that will help expand knowledge and understanding about the historical experience of people with disabilities in the United States.
